

Town of Newburgh Hydrant Flushing April 30 to May 11, 2018

The Town of Newburgh Water Department will begin flushing of distribution mains, laterals and hydrants, on Monday, April 30, 2018, at approximately 8:00 A.M.

THIS MAY RESULT IN SOME DISCOLORATION OF WATER

The department will be flushing some areas at night, when water usage is lowest, to minimize this problem.

The major portion of this operation should be completed
by Friday, May 4, 2018.

Remainder of the area flushing will be conducted
May 7 through May 11, 2018.

Curtailment of any unnecessary water usage during this period will be appreciated and will aid the department in completing this program as quickly as possible.

We appreciate your understanding and your cooperation.
