

# BOIL WATER NOTICE

Loss of pressure in the Town of Newburgh Consolidated Water District

## BOIL YOUR WATER BEFORE USING

**Bring tap water to a rolling boil, boil for one minute, and cool before using.** Or use bottled water certified for sale by the New York State Department of Health. Boiled or bottled water should be used for drinking, making ice, washing dishes, brushing teeth, and preparing food until further notice.

This Boil Water Notice applies to residents located in the following area:

**Hyvue Drive, Barclay Manor, Maine, Maine, Massachusetts, Greenwood, Kentucky**

### What Happened?

At about 7:00AM on January 24, 2025 the water system lost pressure due to a water main break on HyVue Drive.

When water mains lose pressure it increases the chance that untreated water and harmful microbes can enter your water.

*Harmful microbes in drinking water can cause diarrhea, cramps, nausea, headaches, or other symptoms and may pose a special health risk for infants, some elderly, and people with severely compromised immune systems. But these symptoms are not just caused by microbes in drinking water. If you experience any of these symptoms and they persist, you should seek medical advice.*

### What is being done?

The water main break was isolated and repaired. The local area was thoroughly flushed to provide fresh water, and bacteriological sampling began.

It is likely that you will need to boil water for the next **3-5 days** until our samples show adequate results. You will be informed when tests show that you no longer need to boil your water.
