**Date:** July 24, 2013

**Re: Water Department Laborer Interviews and Selection Recommendation**

---

In response to the posting of the laborer position approved by the Board, I received a list of five (5) interested applicants. Interviews were conducted at the Commissioner's Office on Tuesday, September 10 and Wednesday, September 11, 2013 to fill this position. Charlene Black, Personnel Director, was in attendance throughout the interviews. All of the applicants interviewed were evaluated on their qualifications, experience, knowledge and skills as related to meet the specifications of this position.

Although it was a very hard decision due to the list of very qualified applicants, I am pleased to recommend Craig Marti from the Highway Department to fill this position.

As the above requires Town Board action, I am requesting that this item be placed on the next available agenda for approval. If you have any questions or comments, I am available to discuss them with you. Thank you.

---

The geotechnical subcontractor will be on site the week of September 23. As mentioned, this information is necessary for the design of the culvert headwalls and the buried retaining walls. The next step I need Town Board authorization for is:

- a. the design of the concrete headwalls and guide rail system and;
- b. a survey of existing topography for the final road geometry.

Based on discussions with Clark Patterson Lee and Contech, the most cost effective means to complete the headwall design is to have Contech provide the design. The proposed cost for this work is \$3,500. For the field survey, CPL has given a proposal of \$3,400.

As the above requires Town Board action, I am requesting that this item be placed on the next available agenda for approval. If you have any questions or comments, I am available to discuss them with you.
