Ms. Cheryl Cunningham  
Newburgh Animal Shelter  
645 Gidney Avenue  
Newburgh, NY 12550

Re: Estate of Joseph Byczek

Dear Ms. Cunningham:

Joseph Byczek died on November 7, 2016, and we represent his estate.

As is required by law, enclosed please find a copy of Orange County Surrogate's Court Notice of Probate, no action on your part is required.

You are receiving these documents because of the legacy set forth in Article FIFTH b of the Will as follows:

"I bequeath the sum of \$2,500.00 to the Newburgh Animal Shelter"

Should you have any questions concerning the estate, please do not hesitate to contact me.

Sincerely yours,

Mary Fern Breheny

10-31-16		1	Bandage - Medicated Wound Dressing	65.00	32.50	32.50 **

After certain surgeries, your pet may need to be bandaged, splinted, or casted. All of these materials need to remain clean and dry. This means staying off dewy ground, and out of the rain, puddles, mud, the water bowl, kiddie pools, and baths. If it's raining or the ground is wet when your pet has to go outside to eliminate, cover the bandage with a plastic bag; check that there aren't any holes in the bag and tape it to keep the bag up. Remove the bag and tape as soon as the pet comes back inside. If bandages get wet, have them checked and replaced as needed as soon as possible.

Problems associated with wet bandages, splints or casts can range from an irritated incision to more serious complications, including in some cases gangrene that results in loss of the limb.

Bandages need to be checked regularly, at least three times a day, preferably more.

Watch for swelling above or below the material and report any swelling immediately to your veterinarian. If the bandage, splint or cast is too tight, the swelling will cut off necessary circulation.

Smell the material every day. A new, bad odor indicates that it should be rechecked by the veterinarian as soon as possible and certainly within a few hours of noticing such a change.

•If the leg is splinted the digits may be left exposed at the bottom. Check the toes each time you check the splint to make sure he can still feel his toes (lightly pinch to see if he pulls the limb away or otherwise reacts), and also check for excessive swelling or coldness of the digits. Any concerns with the appearance of the digits or bandage should prompt an immediate call to your veterinarian or local veterinary emergency clinic.

•You can apply talcum powder or cornstarch to help prevent sores from occurring where the skin is rubbed by the cast or splint. Any sores that don't improve after being powdered should be seen by your veterinarian.

•Splints and casts should only be adjusted by your veterinarian. Some splints need to be used for many weeks.

•Splints and casts are not always comfortable. Expect a bit of licking or chewing, and possibly mutilation of the cast or splint. If you suspect there is a problem, it's better to prevent additional trouble, so talk to your veterinarian sooner rather than later.

### Doctor's Instructions

#### **Bandage - Medicated Wound Dressing Large**

Please be sure to keep your pet's bandage dry. You should place a plastic bag over it whenever going outdoors. Also, check for any pain, discomfort, odor, or swelling of the bandaged area. If you have any problems, please be sure to contact us. The bandage should be replaced/rechecked/removed in \_\_\_\_\_ days.

#### **Sedation**

**FOOD & WATER-** With the excitement of returning home after surgery, your pet may be inclined to drink and eat excessively, which may result in vomiting. To avoid this we recommend restricting access to water for an hour or so until your pet has quieted down. Then allow only small amounts of food and water for the first eight hours. Normal feeding may resume the next day.

**ELIMINATION-** Many patients may not have a bowel movement for 24-36 hrs. after surgery. This is normal.

**EXERCISE & ACTIVITY-** Patient recovering from surgery should have limited exercise. Avoid giving your pet access to stairs or other situations that may lead to injury.

**MEDICATIONS-** Please follow directions on any medications carefully.

**SUTURES-** Discourage your pet from licking or chewing at sutures. Please check the

11-03-16		1	OSHA Compliance Biohazards Fee	6.70	3.35	3.35 **
11-03-16		1	Bandage - Medicated Wound Dres	65.00	32.50	32.50 **

After certain surgeries, your pet may need to be bandaged, splinted, or cased. All of these materials need to remain clean and dry. This means staying off dewy ground, and out of the rain, puddles, mud, the water bowl, kiddie pools, and baths. If it's raining or the ground is wet when your pet has to go outside to eliminate, cover the bandage with a plastic bag; check that there aren't any holes in the bag and tape it to keep the bag up. Remove the bag and tape as soon as the pet comes back inside. If bandages get wet, have them checked and replaced as needed as soon as possible.

Problems associated with wet bandages, splints or casts can range from an irritated incision to more serious complications, including in some cases gangrene that results in loss of the limb.

Bandages need to be checked regularly, at least three times a day, preferably more.

Watch for swelling above or below the material and report any swelling immediately to your veterinarian. If the bandage, splint or cast is too tight, the swelling will cut off necessary circulation.

Smell the material every day. A new, bad odor indicates that it should be rechecked by the veterinarian as soon as possible and certainly within a few hours of noticing such a change.

•If the leg is splinted the digits may be left exposed at the bottom, Check the toes each time you check the splint to make sure he can still feel his toes (lightly pinch to see if he pulls the limb away or otherwise reacts), and also check for excessive swelling or coldness of the digits. Any concerns with the appearance of the digits or bandage should prompt an immediate call to your veterinarian or local veterinary emergency clinic.

ok  
C. Cole

•You can apply talcum powder or cornstarch to help prevent sores from occurring where the skin is rubbed by the cast or splint. Any sores that don't improve after being powdered should be seen by your veterinarian.

•Splints and casts should only be adjusted by your veterinarian. Some splints need to be used for many weeks.

•Splints and casts are not always comfortable. Expect a bit of licking or chewing, and possibly mutilation of the cast or splint. If you suspect there is a problem, it's better to prevent additional trouble, so talk to your veterinarian sooner rather than later.

11-03-16                                      100 Trazodone 100mg tablets #219101                                      33.55

### **Doctor's Instructions**

#### **Bandage - Medicated Wound Dressing Large**

Please be sure to keep your pet's bandage dry. You should place a plastic bag over it whenever going outdoors. Also, check for any pain, discomfort, odor, or swelling of the bandaged area. If you have any problems, please be sure to contact us. The bandage should be replaced/rechecked/removed in \_\_\_\_\_ days.

#### **Sedation**

**FOOD & WATER-** With the excitement of returning home after surgery, your pet may be inclined to drink and eat excessively, which may result in vomiting. To avoid this we recommend restricting access to water for an hour or so until your pet has quieted down. Then allow only small amounts of food and water for the first eight hours. Normal feeding may resume the next day.

**ELIMINATION-** Many patients may not have a bowel movement for 24-36 hrs. after surgery. This is normal.

**EXERCISE & ACTIVITY-** Patient recovering from surgery should have limited exercise. Avoid giving your pet access to stairs or other situations that may lead to injury.

**MEDICATIONS-** Please follow directions on any medications carefully.

**SUTURES-** Discourage your pet from licking or chewing at sutures. Please check the incision daily for swelling, redness, or discharge. If sutures appear irritated or infected, notify us. Any external sutures should be removed by us in 10-14 days.

**MONITORING-** A decrease in activity or appetite may be observed. However, if your pet exhibits any of the following symptoms, please notify the hospital. 1) Loss of appetite for more than 1 day; 2) Refusal to drink water for more than 1 day; 3) Weakness; 4) Depression 5) Vomiting and/ or diarrhea.

**ATTENTION: JAMES OSBORNE, TOWN ENGINEER**  
**SUBJECT: SUNSHINE FORD (15-24)**  
**LANDSCAPING AND SECURITY COST ESTIMATE**

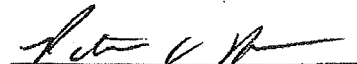

Dear Mr. Osborne:

This office has received a revised bond estimates for landscaping and security on the subject project in the amount of \$14,960.00. In addition, stormwater management estimates prepared by Greg Shaw's office estimates in the amount of \$36,390.00.

This office takes no exception to the Town Board accepting the bonding amounts proposed by the Applicant's engineer for the work on the approved plan.

Please feel free to contact the undersigned should you require any additional information regarding this matter.

Very Truly Yours,

  
Patrick J. Hines  
Principal

Town of Newburgh  
1496 Route 300  
Newburgh, NY 12550

**ATTENTION: JAMES OSBORNE, TOWN ENGINEER**

**SUBJECT: COLANDREA SUNSHINE FORD (13-24)  
RELEASE OF LANDSCAPING AND SECURITY**

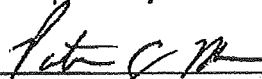

Dear Mr. Osborne:

This office is in receipt of a request for release of landscape securities for the subject project. A review of the project sites has identifies that the previously approved landscaping has been completed in substantial compliance with plans approved by the Planning Board.

Based on the above this office takes no exception to the Town releasing the previous landscape security in the amount of \$20,625.00. As you may be aware a new project is being undertaken that requires the posting of new landscape and stormwater securities on the site. The Applicant is requesting the previous posted securities released at this time.

Please feel free to contact the undersigned should you require any additional information regarding this matter.

Respectfully submitted,

  
Patrick J. Hines  
Principal

**Date: November 21, 2016**

**Re: Cash Transfer**

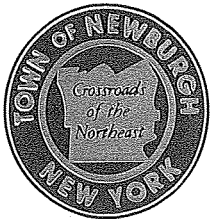

---

Each year the Town funds the Water Meter Replacement Capital fund via a transfer in from the Water Fund. This year we have spent approximately \$126,000.00 (does not include the \$1,500,000 we spent with debt financing).

At this time I am requesting a cash transfer of \$126,000 from the Water Fund to the Capital Fund to fund this expenditure.

Thank you in advance for your approval.
