**REVIEW DATE: 25 MARCH 2020**  
**MEETING DATE: 16 APRIL 2020**  
**PROJECT REPRESENTATIVE: BOHLER ENGINEERING**

1. Project will require referral to ZBA for parking. 62 parking spaces required while 30 are proposed.
2. Long Form EAF submitted appears to be missing the map and summary pages at the end. EAF identifies potential issues with Indiana Bats and two Sturgeon species associated with the Hudson River. .EAF identifies the site in an archeological sensitive area requiring submission to OPRHP as an involved agency
3. Project will require submission to NYSDOT and Orange County Planning due to property fronting on state highway.
4. Bulk table should identify front yard setback is 60 ft. for projects that front on state highway. Town code section 185-18 (4) (b).
5. Project proposes parking in the front yard setback in front of the proposed structure. This is not consistent with the towns design guides. Please review design guides with regard to this requirement and Hamlet area development.
6. The location of the site access drive is very close to the RT 9W / North Hill Rd intersection. Address queuing at access drive intersection.
7. Future plans must address water and sewer services for the site. Fire sprinkler system is required based on Town Code. Water System must be designed such that potable water is terminated if fire line is terminated. Detail can be provided for use.

• Regional Office • 111 Wheatfield Drive • Suite 1 • Milford, Pennsylvania 18337 • 570-296-2765 •

8. Site Grading Plan with finish floor elevation must be provided.
9. Wetland Delineation report must be submitted. Amount of wetland fill / impact must be addressed.
10. Retaining walls in excess of 4 feet high require building permit and stamped design plan.
11. Stormwater Management in compliance with Town of Newburgh requirements must be documented.
12. Detail of proposed monument sign should be provided.
13. Information regarding the easements shown on the Alta survey must be submitted. Several large easements encumber the property. A 250 foot, 80 ft. and a proposed 30 easement are shown on the survey plan sheet.

Attention: John P. Ewasutyn, Chairman

**Re: Site Plan Review Application  
Proposed Retail Store  
SE Corner of US Route 9W & North Hill Lane  
Section 24, Block 4, Lot 1.12**

Dear Mr. Ewasutyn:

On behalf of our client, HSC Balmville, LLC, we are pleased to submit this application for Site Plan Review to the Town of Newburgh Planning Board. HSC Balmville, LLC is proposing to develop the 2.16-acre parcel reference above with a 9,100 square-foot Retail Store along with associated parking, landscaping, access, site lighting, utilities and stormwater management.

## Project Narrative

The site is located at the southeastern corner of North Hill Lane and US Route 9W and is currently undeveloped. Currently the site has a wooded area near the intersection of North Hill Lane and US Route 9W, surrounded on three sides by on-site Federal Wetlands. The south and eastern boundaries of the property have wooded buffers between the subject property and the neighboring properties.

The proposed development of the 9,100 square-foot Dollar General Retail Store will disturb less than 1 acre of land on the site. Most of the site will remain undisturbed as these areas are primarily Federal Wetland areas along with the wooded buffer between the subject and neighboring properties.

Access to the store will be along North Hill Lane and consists of one 30-foot wide driveway which is suitable for store circulation and deliveries. 30 parking spaces are proposed to serve the store. 62 parking spaces are required by Code, however, there is not a need for this many parking spaces and it is therefore a benefit to have additional greenspace, rather than the pavement for the additional parking spaces that are not warranted for this proposed use. We kindly request that the Planning Board consider making a positive recommendation to the Zoning Board of Appeals for the granting of an area variance.

The store will be provided with electric service from existing overhead wires and poles that run along North Hill Lane. Water and natural gas run along the east side of US Route 9W and are intended to be tied into for this project. The site will utilize underground detention to manage stormwater from the proposed development and will include an on-site septic system for wastewater.
