

**TOWN OF NEWBURGH
PLANNING BOARD
TECHNICAL REVIEW COMMENTS**

PROJECT NAME: ROUTE 32 EXPRESS- 689 NYS ROUTE 32
PROJECT NO.: 22-21
PROJECT LOCATION: 689 NYS ROUTE 32
SECTION 4, BLOCK 2, LOT 6
REVIEW DATE: 10 MAY 2024
MEETING DATE: 16 MAY 2024
PROJECT REPRESENTATIVE: URDA ENGINEERING

1. The project is located in the Town's Chadwick Lake Reservoir Critical Environmental Area. All projects in the Critical Environmental Area are considered Type I actions based on the Town Code. A coordinated review is required.
2. A schematic plan of the proposed 3,600 square foot convenience store has been submitted. An existing one-story frame structure currently serving as a convenience store exists on the site. Gasoline fueling previously proposed has been removed.
3. The existing convenience store is a pre-existing non-conforming use in the zone.
4. Section 185-19 – Non-conforming Buildings and Uses, would apply to the site. The applicant's attention is called to Section 185-19A(3) - Changes In Use "a non-conforming use shall not be changed to another non-conforming use without a special permit from the Zoning Board of Appeals, and then only to a use, which in the opinion of said Board, is of the same or more restricted nature". The Planning Board may wish to consider referring the project to the Zoning Board of Appeals under this Section of the Code.
5. The project is located in the Town's RR District. The RR District only allows residential uses. It is noted that the RR District is designed to protect the Chadwick Lake watershed.
6. Compliance with the Tree preservation Ordinance must be documented on future plans.
7. The access to the site is via a NYSDOT non-compliant driveway. NYSDOT will most likely require a conventional commercial driveway access in compliance with the MUTCD.
8. All provisions of Section 185-22 – Environmental Sensitive Areas, C. Critical Environmental Areas must be addressed. Specifically Section 185-22C 1 and 2 should be addressed. All site area to be disturbed by construction, site development and by land management activities, such areas shall not exceed 20% of the gross site area.

9. The applicants have submitted a plan with the bulk tables for the B Zoning District. As previously identified, the project is in the RR Zoning District and the B Zoning District bulk requirements do not apply to this use in this location.
10. The proposed convenience store will most likely be considered a non-transient community water system. Approval By Orange County Department of Health for the well and sub-surface sanitary sewer disposal system will be required. It is noted the well location on the site does not have the ability to control all land area within a 100-foot radius.
11. Future submissions should contain topography, grading, erosion and sediment controls, and detailed site designs. Stormwater management must be addressed on the site in consideration of the location of the project in the RR Zoning District.

Respectfully submitted,

Mr. John Ewasutyn, Chairman Address

Re: 32 Express
Site Plan Application - UPDATES

Dear Chairman Ewasutyn:

Based on the Town's feedback relative to the existing application and the prior layout, which included a larger building (4,320 SF) and a fueling stations/island, the Owner/Applicant has revised their interests to include only a smaller convenience store (3,600 SF) and no fueling stations/island. Their current convenience store is undersized and in disrepair and desperately needs an upgrade. With the information provided, we request the ability to appear before the Town at their next May zoning meeting, or the next available time-slot.

As discussed, the following are enclosed for your consideration and for the Town's guidance on how to proceed.

14 copies	5/3/2024	Site Plan C100 (updated)
14 copies	5/3/2024	Project Narrative (updated)
14 copies	5/3/2024	Full EAF (updated)
14 copies	---	Photo of similar style building (Liberty, NY)
14 copies	---	Conceptual Floor Plans and Elevations

While these building plans were not required, we have them conceptually and have provided them for your reference.

We anticipate clarification from the Zoning Board that the use can continue, after which we intend to provide a complete set of site plans along with architectural plans, landscaping, and lighting.

These documents have also been provided electronically to the Town, as well as to the Board's legal counsel, engineering consultant, and traffic engineering consultant.

The site is within the Reservoir District (RR) and has had a commercial use as a convenience store on site for decades. For design purposes, we have considered the 'use and bulk requirements' as if this was in the Business District (B) which allows convenience stores. We understand these items are subject to Zoning and Planning reviews. A "Site Data" table has been added to the plan to show this bulk requirements (required vs. proposed).

The revised layout provides for improved parking area, with a greater setback from the road. The proposed building is setback approximately 25 feet further from the road than the existing building. There is space for additional parking with safe turning movements in front of the building, as well as to the north of the building. Larger deliveries to the rear of the building will occur, as opposed to the front which occurs currently. The paved areas and access aisles are designed to meet Town code while accommodating delivery trucks (WB-40 design vehicle) and emergency vehicles around the building. The entrance pavement width at Route 32 is reduced slightly from existing to pull it back from the property corners to provide safer clearance from utility poles on the north, and a mailbox on the south. The entrance radii conform to the NYSDOT commercial driveway design standards and are subject to NYSDOT review.

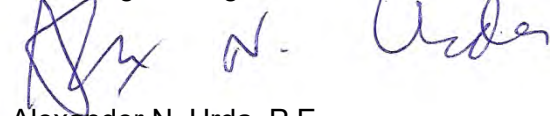

The site has an existing well and an existing subsurface septic system. The new configuration will require that both be replaced and upgraded in new locations.

The site layout provides for adequate space for screening/buffering to the north and south adjacent to the residential zone per the Town Code.

The site disturbance is currently under one acre. As grading and septic design are advanced, we anticipated that the general reserve area provided will be reduced and the site disturbance area also reduced. Therefore, we do not anticipate the need for a NYSDEC stormwater SPDES permit for construction activities.

We appreciate your consideration relative to this project and look forward to hearing from you about meeting attendance and timing.

Sincerely,
Urda Engineering, PLLC
